

M88 | DRIVE

Product detail

- Compounded with Leader Rubber Company's exclusive PREMIUM PLUS compound.

Application

- Drive axle design for on road applications for the long haul, regional and metro segments of the market.

Features & Benefits

- Non directional tread design and deep tread grooves enhance traction and eliminates slip in wet and dry weather conditions
- Stabilisers between blocks provide for even wear and excellent mileage, whilst subject to strong torque forces on the drive wheel position.
